

# silicone façade

masonry protection coating

SREP has been used on many significant buildings including the Kremlin

**Certified for best possible performance**

**How we meet and exceed norms**

- The German Thermal Insulation Ordinance: 1977, 1984 and 1985
- The German Energy Saving Ordinance: 2002, 2004 and 2007

## Time you reduced your energy bills?

### A wallcoating to reduce your...

- Fuel bills
- Carbon footprint
- Environmental impact

**silicone façade** is the most technologically advanced wallcoating available today.

- Water repellent exterior masonry coating
- Self-cleaning
- Creates a dry building
- Eliminates damp
- Energy saving, reduces heat loss
- Hydrophobic coating, shuts out water ingress through masonry walls
- Breathable
- 15-20 year lifespan

“ It is a proven fact that wet walls transfer heat twice as quickly as dry walls. The wetter the wall the more energy has to be expended to obtain an ambient room temperature of 20°C. ”

Reduce your carbon footprint

Protect your home against the elements

Water repellent exterior masonry paint

Thermal efficient nano technology

Reduce your home energy bills

## Properties of Ecocoat Silicone Façade:

Water repellent • Water vapour permeable • Weathering resistant  
Abrasion resistant • 15-20 year lifespan • Self cleaning  
Resistant to algae and moss etc • Made with Nano technology

**When mineral building materials come into contact with water, the amount absorbed depends on their porosity.**

The result is damage in various forms, including:

- Penetration of moisture through the wall
- Cracks due to swelling and shrinkage
- Damage caused by frost and de-icing salts
- Efflorescence and salt damage caused by hydration and crystallisation
- Lime leaching
- Rust stains
- Dirt pick-up
- Attack by fungi, moss, lichen and algae
- Chemical erosion
- Impairment of the surfaces thermal insulation properties

...fortunately the above problems can be overcome with the use of Ecocoat Silicone Façade.
